- x Member of the Public Health Committee.

PUBLIC HEALTH OFFICERS OF THE COUNCIL

Medical Officer of Health:

ERIC WARD, M.R.C.S., L.R.C.P., D.P.H. (Appointed 1-1-48.)

Sanitary Inspector and Cleansing Superintendent.

T. MARSH, A.R.S.I., M.S.I.A.

Divisional Health Office, Woodville,

Scar Lane,

GOLCAR,

Nr. Huddersfield November, 1949.

To the Chairman and Members of the Denby Dale Urban District Council.

Mr. Chairman and Gentlemen,

I have the honour to present to you my second Annual Report on the health of the Denby Dale Urban District and the work of the Public Health Department during the year 1948. The Report is the 11th in the series since the formation of the enlarged Urban District in 1938.

The County Council Scheme of Divisional Health Adminstration commenced on the 1st January, 1948. Under this scheme all the preventive medical services in the area are administered together by one Medical Officer acting as Divisional Medical Officer for County Council work, and as Medical Officer of Health for sanitary authorities within the Division. Denby Dale is placed in Division No. 20 which also includes the Urban Districts of Colne Valley, Holmfirth, Kirkburton and Meltham. During the year the Divisional organisation has gradually been built up and at the end of the year was reasonably complete.

Considerable re-organisation has also taken place under the direction of the Sanitary Inspector of the Public Health Department at Denby Dale, including the collection of considerable information regarding water supplies, sewerage and general housing statistics. The appointment of a general clercial assistant has greatly facilitated this work.

The various particulars of the Vital Statistics relating to the District show that the health of the community has been well maintained and apart from some increase in cases of Measles and Whooping Cough there has been no abnormal incidence of infectious or other diseases.

Progress with the provision of new houses has continued but there is still need for many more new houses and for the reconstruction of many existing dwellings.

In conclusion, I wish to tender my thanks to the Chairman and Members of the Council for the encouragement which I have received from them, and to express my appreciation for the help and co-operation given to me by the Clerk and other Officials of the Council and in particular for the loyal service so freely given me by your Sanitary Inspector, Mr. T. Marsh, without whose enthusiasm many of the improvements in the District would not have been carried out.

I am,

Your obedient servant,

ERIC WARD

Medical Officer of Health.

STATISTICS AND SOCIAL CONDITIONS OF THE AREA NATURAL AND SOCIAL CONDITIONS OF THE DISTRICT

The Denby Dale Urban District was formed under the Yorkshire West Riding County Review of 1938, by the amalgamation of the former Urban Districts of Clayton West, Denby and Cumberworth, Emley and Skelmanthorpe. It is very varied in character with well wooded valleys and bleak uplands rising to 1,000 feet above sea level.

The principal industry is the manufacture of various kinds of textiles, but there are also several small coal mines, clay pits, stone quarries and fire clay, works. In addition, agriculture, principally dairy farming, provides employment for a number of the inhabitants.

VITAL STATISTICS.

Population

The Registrar-General's estimate of the population at mid-1948 was 9,724 as compared with 9,539 at mid-1947. This increase is due partly to an excess of births over deaths of 22, but mainly to an influx of population from other areas.

Births.

After adjustment for inward and outward transferable births, a net total of 153 live births (84 male, 69 female) was registered in the District during the year, a decrease of 30 compared with the previous year.

The BIRTH RATE is 15.73 per 1,000 of the population as compared with 19.18 for the previous year, 17.9 for England and Wales, 18.5 for the West Riding Administrative County and 18.3 for the Aggregate West Riding Urban Districts.

The illegitimate live births number 1 or 0.65% of the total live births, a decrease of 3 compared with the previous year.

Stillbirths.

After adjustment for transfers, 2 still births were registered during the year as compared with five for the previous year. This figure gives a rate of 12.90 per 1,000 live and stillbirths, and 0.21 per 1,000 of the population as compared with 26.59 and 0.52 respectively for 1947.

Deaths.

After correction for inward and outward transferable deaths, the net total deaths registered in and assigned to the District was 131 (64 male 67 female), a decrease of 28 on the total for the year 1947.

The DEATH RATE is 13.47 per 1,000 of the population as compared with 16.67 for the previous year.

The following were the principal causes of death in order of frequency:—

These 4 causes accounted for 77.1% of the total deaths. Particulars of the various causes of death and of the age and sex distribution are given in the following table:—

| Causes of Death | Sex | All | 0- | 1- | 2- | 5- | 15- | 25- | 35- | 45- | 55- | 65- | 75- |

Maternal Deaths and Mortality.

There were no deaths from Puerperal Sepsis or other maternal causes.

Infant Mortality.

After correction for transferable deaths, there were 5 deaths (3 male 2 female) of infants under one year of age, a decrease of 1 compared with the previous year.

The INFANT MORTALITY RATE is 32.68 per 1,000 live births

as compared with 32.79 for the previous year.

The death rate amongst legitimate infants per 1,000 legitimate live births is 26.32 as compared with 33.52 for the year 1947.

The only illegitimate child born in the District during the year died under I year of age.

Section II.

GENERAL PROVISION OF HEALTH SERVICES FOR THE AREA Staff

In addition to the Medical Officer of Health who is a part time officer, the staff consists of a full time Sanitary Inspector, a Junior Assistant and a female clerk who is shared with the Surveyor and Water Engineer.

Laboratory Facilities.

All the bacteriological laboratory work required to be undertaken by the Health Department and by General Practitioners is carried out at the Wakefield Public Health Laboratory of the Medical Research Council, whilst samples of water for chemical examination are sent to the laboratories of Messrs. Richardson & Jeffe, Public Analysts, Bradford.

Ambulance Facilities

(a) Cases of Infectious Diseases,

The ambulance of the Isolation Hospital to which the patient is admitted is used for removal of patient.

Cases of sickness and accident.

An Ambulance Service is operated by the West Riding County Council, the Denby Dale Urban District being in Ambulance Area No. 18. The principal Depot for the area is situated at Huddersfield.

Professional Nursing in the Home.

General: Home nursing is undertaken by the Home Nurses who were employed by the following Local District Nursing Associations until the 5th July, 1948, when they were transferred to the staff of the West Riding County Council.

- Denby Dale and Cumberworth Association 2 Nurses.
- Scissett, Clayton West and High Hoyland ... 2 Nurses.
- I Nurse. Skelmanthorpe 3.
- I Nurse. 4. Emley

Midwifery: All the Nurses emloyed until the 5th July, 1948, by the District Nursing Associations (except the Skelmanthorpd nurse) were practising midwives.

Further details of the nursing services provided in the area will be found in Section VII of this report.

Treatment Centres, Clinics and Hospitals

Infant Welfare Centres

Held fortnightly on Wednesday in Denby Dale and fortnightly on Wednesday in Skelmanthorpe.

Ante-Natal Clinics.

Held monthly on the 1st Tnesday in the month at Denby Dale, and on the 3rd Tuesday in the month at Skelmanthorpe.

School Clinics

Held fortnightly on Wednesday in Denby Dale and fortnightly on

Wednesday in Skelmanthorpe.

All the Denby Dale Clinics are held in the Victoria Memorial Hall, Denby Dale, and the Skelmanthorpe Clinics in the Wesleyan Reform Chapel, Skelmanthorpe.

Tuberculosis Dispensary

Held on Tuesday afternoon and Friday afternoon at I, Peel Street, Huddersfield.

Venereal Diseases Clinics

Held at York Place, New North Road, Huddersfield, on Monday, Tuesday, Wednesday, Thursday and Friday.

Held at Clayton Hospital, Wakefield, on Monday, Tuesday, Wednesday and Friday.

Held at the General Infirmary, Dewsbury, on Monday, Thursday and Friday.

Hospitals.

(a) Infectious Diseases: Until the 5th July, 1948, cases of Infectious Diseases other than Smallpox were treated at the Penistone Isolation Hospital. Under the National Health Service Act Denby Dale is placed in the Leeds Regional Hospital Area, and cases of Infectious Diseases are now admitted to the Mill Hill Isolation Hospital, Huddersfield.

Accommodation for cases of Smallpox is provided by the Regional Board at Cottingham Smallpox Hospital, Cottingham, East Yorkshire.

(b) General Hospitals:

Huddersfield Royal Infirmary. County General Hospital, Wakefield.

(c) Maternity: Arrangements are made for the admission of patients to the Princess Royal Maternity Home, Huddersfield, and various general hospitals.

SANITARY CIRCUMSTANCES OF THE AREA

Water Supply

The District is supplied from 2 sources :-

- 1. The Dewsbury and Heckmondwike Waterworks Board.
- 2. The Huddersfield Corporation Waterworks.

The water is purchased in bulk and distributed by the Council.

The Dewsbury and Heckmondwike supply serves the greater part of the area. It is received at 3 points into 2 open reservoirs and 1 covered tank. Treatment by chlorination is carried out by the Waterworks Board.

The Huddersfield Corporation supply serves the Emley part of the area and is received into a covered tank. Treatment by tiltration and chlorination is carried out at the Corporation's Waterworks.

These supplies are available throughout the area except in a few solated localities. Of the 3,139 houses in the District, 3,097 are connected to the public mains and in all instances the supply is indoors. Of the 42 houses not connected, 31 have private piped supplies whilst 11 depend on wells for their supply.

The maximum amount of water which can be provided by the water undertakers is insufficient to meet the present needs, and this, together with distribution difficulties, gives rise to serious shortages in high level areas, and in particular at Emley, High Flatts, Birdsedge, and Toppit (Denby.)

Samples of water from 2 statutory undertakings are taken at regular intervals from consumers' premises and submitted to the County Pathologist for bacteriological examination. Of 25 samples submitted the reports showed that 20 were highly satisfactory, 3 were satisfactory, 1 was of suspicious character and 1 was unsatisfactory. As a highly satisfactory report was obtained 2 days after the unsatisfactory one it is probable that contamination in sampling occurred when the first sample was taken.

Similar sampling has been carried out for observation purposes of the Rusby Spring and Rusby 'New' Wells formerly used as a public supply. Some 23 samples were submitted, 21 being reported as highly satisfactory and the remainder as satisfactory.

A total of 5 samples were taken from private supplies, the reports on 3 of which were satisfactory and unsatisfactory on the other 2.

The results of the examinations are tabulated as follows:—

| Supply & Locality | Date of Sample | Coliform Bacilli per 100 ml. | Faecal Coli, per 100 ml. | Chlorine part 1,000,000 | p.H. value | Remarks |

Water main extensions in connection with the Council's new housing estates have been carried out as follows:—

Saville Street, Emley 280 yards.

Lane Hackings, Cumberworth 442 yards.

Sunnymead, Scissett 202 yards.

During the year 3 existing houses were connected to the public mains in addition to 48 new houses.

Negotiations are in progress with neighbouring authorities regarding an extension of the Huddersfield Corporation service in order to provide an improved supply in the Sovereign Inn area.

^{**} Not used for drinking water.

^{***} The Council has now laid a water main to the boundary of the Jane Wells premises

Drainage and Sewerage.

There are 5 main outfalls for the sewerage systems consisting of 4 filtration works and an outfall dealt with by irrigation on to grassland A number of small filtration tanks serves some of the outlying areas. Details of the areas served by each works are given below:—

| Works | Popul- ation | Dwell- ings- | Fact- ories | School | Other Pr'ises |

| works maintained by the Council: | 0115 | 2000 | 21 | | 1 |

Some 96 other dwellings, including farms, are drained into septic tanks and filters not maintained by the Council, whilst 375 dwellings, including farms, discharge their sewage without treatment on to fields or into streams and other watercourses. These houses are situated mainly in outlying areas which are unsewered or only partly sewered. Whilst it would be unreasonable to construct sewers to serve all the unsewered areas schemes are required for Birdsedge, High Flatts and Lower Denby.

Complaints were received during the year from the West Riding Rivers Board regarding the quality of the effluent discharged from the Broomhall Works. Improvements carried out or commenced include the reconstruction of the rotary filters at the Langley Works and the provision of humus tanks and settling chambers at the Broomhall Works.

Rivers and Streams

There are numerous instances of pollution of water courses with sewage from domestic and industrial premises. In many instances this cannot be remedied until sewerage schemes are provided for the outlying unsewered parts of the District.

Closet Accommodation

A survey, of closet accommodation throughout the District has been made and this shows the position to be most unsatisfactory, over one-third of the closets in the District being privy middens. Owing to the absence of sewers and the lack of water, particularly in the high level areas, conversion to the water system is not possible in many cases at the present time. It is very desirable that these difficulties should be overcome as soon as possible and an active campaign for the abolition of privies commenced.

In spite of difficulties 51 privies were reconstructed as water closets ruring the year as compared with 17 in 1947, the work being carried out in 2 cases as a result of statutory action under Section 44 of the Public Health Act. No action was taken under Section 47 of the Act but the Council continues to make a grant of £3 for each closet converted.

A summary of the closet accommodation provided for dwellings and all other premises in the District is given below :—

| Ward | Water Closets | Privies | Pails | Total |
|-----------------------|------------------|---------|-------|-------|
| Clayton West | 439 | 196 | I | 636 |
| Emley | 187 | 281 | 3 | 471 |
| Denby and Cumberworth | 692 | 324 | 5 | 1021 |
| Skelmanthorpe | 888 | 356 | I | 1245 |
| Total | 2206 | 1.157 | 10 | 3373 |

Refuse Collection and Disposal

Scavenging is undertaken throughout the District by the Council with direct labour under the supervision of the Sanitary Inspector, 2 covered type motor waggons being employed. Domestic refuse is collected at 2 weekly intervals and privies and ashpits are emptied approximately every 6 weeks. Controlled tipping is carried out at the tips at Skelmanthorpe, Emley and Birdsedge, whilst crude tipping is done at Denby. A tip attendant is employed to keep the tips in good order and 8 men are engaged in the work of collection.

Number of dustbins in the district 1,840 Approximate total weight of refuse removed 4,000 tons.

Salvage.

From the 1st January to the 31st August, 1948, salvage collection was done by a private firm. From the 1st September, 1948, the work has been done by the Public Health Department.

A full-time collector with a motor vehicle was engaged until December, when the Council, in an effort to increase the quantity of salvage, engaged part-time staff for collection and baling.

The total amount and value of salvage collected during 1948 is as follows:—

| | T. C. Qrs. £ s. d. | _ |
|---------------------------|----------------------|----|
| Waste paper and cardboard | 58 2 2 415 8 0 | |
| Scrap Metal | 15 4 0 49 19 3 | |
| Textiles | — I4 I I5 4 5 | |
| | | 1 |
| | 74 — 3 £480 II 8 | _/ |

Shops Acts

During the year 4 visits and inspections were made of shops.

Petroleum (Regulations) Acts 1928 and 1936. Petroleum (Consolidation) Regulations 1928.

During the year 29 licences to store petrol were issued in respect of 29 premises, I new petrol storage tank was erected and I licence for the storage of calcium carbide was issued.

Smoke Abatement

During the year 23 observations were made on factory chimneys in the area. One factory was visited following the emission of excessive smoke.

Camping Sites.

There are 2 sites in the area licensed under the provision of Section 269 of the Public Health Act, 1936.

Swimming Baths and Pools

There is only one swimming bath in the area. This is owned by the Local Miners' Welfare Fund Committee but is available to the public. It is a modern covered bath with chlorination and filtration apparatus on the 'turnover' system. Chloroscope examination is carried out daily during the season by the Superintendent. During the year 4 samples have also been taken for chemical and bacteriological examination by your Sanitary Inspector, all of which were satisfactory as shown below:—

| Date | Bac. per | Faecal Coli. per rooml. | Coli. | p.h. Value | Chlor. part m. | Remarks |

| the act. | I | I | | |
| Total | 9 | 9 | 6 | |

3. Outworkers.

Some 34 persons resident in the District are employed as outworkers for various firms manufacturing rugs and mats,

Eradication of Bed Bugs.

No houses were found to be infested with bed bugs during the year.

Rats and Mice Destruction Act, 1919.

For the greater part of the year the destruction of rats and mice has been by part-time rat catchers. The Council's tips and sewage works were treated by the Sanitary Inspector's staff, the work being done as recommended by the Rodent Control Division of the Ministry of Agriculture and Fisheries.

In December the Council adopted the Ministry of Agriculture

Scheme for Rodent Control.

Rag Flock Acts, 1911 and 1928

There are no premises in the District where Rag Flock is manufactured, used or sold.

Schools

There are in the District 10 schools, 6 being County Schools including 1 Secondary Modern School and 4 being Voluntary Schools. No serious complaints regarding the sanitary condition at the schools were received during the year, and no schools were closed on account of infectious diseases.

Sanitary Inspection of the Area

During the year the following inspections were made to the premises detailed:—

| Nature of Inspection. | * | | | Visits. |
|-----------------------------------------|-----------------------------------------|-------|-------|---------|

Legal Action

The following Statutory Notices were served during the year under various sections of the Public Health Act 1936 :-

Section 39: 3 notices requiring the provision of satisfactory drainage, including the repair of eaves gutters and fall pipes.

2 notices requiring the conversion of privy middens. Section 44: Section 75: 2 notices requiring the provision of sanitary dustbins. 2 notices requiring the abolition of a midden together with Section 93:

sundry housing repairs.

All the works specified in the notices were carried out by the owners except in one case under Section 39 where the work was done by the local authority in default.

HOUSING

In spite of the progress made during the year with the Council's new housing schemes, the provision of new houses is still the principal post-war need of the District. There is a grave shortage of houses, and inany of the existing houses lack essential amenities and should be dealt

with under the appropriate section of the Housing Acts.

Mention was made in the last Annual Report of the need for a housing survey of the district. It has not been possible to commence a detailed survey but your Sanitary Inspector has made a preliminary inspection of all houses, in the District. Although this was not completed until March, 1949, for convienience, particular of the whole of the survey are included in this report.

Of the 3,130 houses in the District, 1,727 have the sole use of a W.C. whilst in 129 cases W.C's. are shared. Of the remaining 1,283 houses 903 have the sole use of a privy, 370 share privies and 10 depend

on chemical or pail closets.

The houses with what are generally considered essential amenities, namely, a water closet, a fixed bath, a sink and a sanitary dustbin, number 1,197 or only 38.13% of the total in the District, whilst 1,730 dwellings or 55.11% of the total are without a fixed bath. Details of the conditions prevailing in the various wards are shown below:—

| | DWELLINGS INCLUDING FARMS AND SMALLHOLDINGS | | | | | | | | | |

New Building.

During the year 46 houses were completed by the Council, 10 at Higher Sunnymead, 18 at Emley and 18 at Lane Hackings, Cumberworth. In addition the former Gas Cleansing Centre at Scissett was converted into 2 bungalows. Approval was received for the erection of 44 houses at Smithy Lane, Skelmanthorpe and 20 of these were commenced during Site preparation was also commenced for the erection of 22 Spooner type prefabricated houses at The Royds, Clayton West.

In addition, 3 houses were completed by private enterprise, 2

being in Skelmanthorpe and I at Emley.

Overcrowding

As a result of enquiries made into applications for re-housing and during the survey already mentioned 35 new cases of overcrowding came to notice during the year, whilst 47 cases were abated. There were 25 known cases of overcrowding at the end of the year. This does not appear to be a very large number but when it is realised that under the

Housing Acts all habitable rooms are considered useable for sleeping purposes, it will be appreciated that there are a great many more cases where the living conditions are intolerable but the houses are not legally over-crowded.

Unfit Houses

Action regarding 4 houses at Denby Dale which were the subject of an uncomfirmed Clearance Order has been retarded owing to complicated legal difficulties encountered in establishing ownership.

A Closing Order under Section 12 of the Housing Act was made in respect of a Chapel Hall occupied by a family who were re-housed by the Council.

Particulars of inspections, complaints, nuisances and improvements effected are given in Section III.

Housing Statistics

1. Inspection of Dwelling-houses during the year:

| | • | | | 8 7 | |

INSPECTION AND SUPERVISON OF FOOD MILK SUPPLY

Practically all the milk supplied in the District is produced within the area and distributed mainly by the producers. A quantity of milk is sold wholesale for distribution in neighbouring towns. No milk is sold in the District as pasteurised or heat-treated

| Particulars of registered premises and dairymen | are | as i | follows: |
|----------------------------------------------------|------|------|----------|
| Number of farms registered for milk production | | | 97 |
| Number actually producing at 31st December, 1947 . | | | 164 |
| Approximate number of cowsheds | | | 164 |
| Approximate number of dairy cows in the District | | | 1,300 |
| Number of farms producing Designated Milk:— | | | |
| (a) Tuberculin Tested | | | II |
| (b) Accredited | | | 17 |
| Number producing Non-Designated Milk | | | 63 |
| Number of dairymen registered as :— | | | |
| (a) Wholesalers | | | 41 |
| (b) Retailers | | | 37 |
| (c) Wholesalers and | Reta | iler | s 19 |
| T 6 3 3 3 3 3 4 4 4 | | . 1 | , |

Inspections of cowsheds and dairies have continued throughout the year. Whilst some premises are maintained in a satisfactory condition others leave much to be desired. Provision of proper milk rooms and means of sterilising utensils by steam are still needed in a number of cases.

During the year 27 samples of non-designated milk were submitted for examination by the "Methylene Blue" Test, as compared with 3 in the previous year. Reports show that with the exception of 5 samples all reached the required standard for accredited milk. In addition 25 samples were taken for biological examination for the presence of tubercle bacilli. One sample was found to be positive.

Veterinary investigations were carried out by the Divisional Inspector of the Ministry of Agriculture and Fisheries in an endeavour to find the source of the infection but these were unsuccessful.

Milk (Special Designation), Regulations 1939-46.

| | The following lice | nces were grante | ed duri | ng th | e ye | ear : | |
|-----|--------------------|------------------|----------|-------|------|-------|---------|

| (b) | By the West Ric | ling County Cou | ıncil :- | | | | |
| | (I) | Tuberculin Te | sted | | | | 6 |
| | (2) | Accredited | | | | | 10 |

Samples of milk were obtained regularly by the County Sanitary Inspectors from all farms producing designated milk in the area.

Ice Cream.

There are 8 premises registered under Section 14 of the Food and Drugs Act for the sale of ice cream, 5 of them also being registered for manufacture, but during the year only 4 were used for manufacture and 6 for sale. The manufacturers have been encouraged to improve methods of production and 16 visits, of inspection were made. During the year 6 samples of ice cream were submitted for examination by the "Methylene Blue" Test, 5 were classified as Grade 1 and 1 as Grade 3

Meat.

There are 12 slaughterhouses in the District, all of them being licensed by the Council. By virtue of the Livestock (Restriction of Slaughtering) Order 1940 no regular slaughtering of animals has been carried out at any of these slaughterhouses, but pigs for the producers' own consumption were slaughtered under licences granted by the Ministry of Food at 6 of these premises. So far as possible all pigs slaughtered in the District were inspected by the Sanitary Inspector.

All meat for sale in the District is derived from the Government controlled slaughterhouse and depot in Huddersfield, where inspection is carried out.

Particulars of carcases inspected by the Sanitary Inspector and condemned are shown below :—

| | Cattle ex'd'g | | | Sheep and | |
|-----------------------------------------------------------|---------------|----------|--------|--------------|-------|
| | Cows | Cows | Calves | Lamb | Pigs |

| or organ was condemned | | | | | 11 |
| Percentage of number inspected affected with Tuberculosis | | | | | 1 |
| ed affected with Tuberculosis | | | - 1 | | 4.87% |

In carrying out the work of inspection 121 visits were paid to slaughterhouses and other premises.

During the year 47 visits of inspection were paid to the 14 butchers' shops in the area and 39 to the 28 food preparing premises (includin fried fishshops), registered under Section 14 of the Food and Drugs Act. At the end of the year 12 premises were registered for the manufacture of sausages, etc., and 16 (a decrease of 2 compared with the previous year) for fish frying.

Slaughter of Animals Act 1933

Licences to slaughter, in operation at the beginning of the year numbered 37. During the year 31 expired. 25 were renewed and 6 new licences were granted.

Bread

There are 8 bakehouses in the district, none of them underground, of which 18 inspections were made.

Other Foods

A good general standard of cleanliness is maintained at food premises in the area. During the year 18 visits were paid to general food premises and 1 informal notice regarding defects found was issued.

The following foodstuffs were examined and condemned as unfit for human consumption:—

| Article Butter Bacon Herrings Sugar Meat | Weight $14\frac{1}{2}$ lbs $30\frac{1}{2}$ lbs 70 lbs 33 lbs $5\frac{3}{4}$ lbs 153 $\frac{3}{4}$ lbs | Article Canned Milk Canned Fish Canned Tomatoes Canned Luncheon Meat Canned Vegetables Canned Fruit | Amount 7 tins 3 tins 1 tin 1 tin 4 tins 4 tins |

Section VI.
PREVALENCE AND CONTROL OF INFECTIOUS AND OTHER DISEASES

During the year Measles and Whooping Cough were much more prevalent than in the previous year.

Smallpox.

No cases of Smallpox were notified in the District during the year.

Diphtheria

There was I case of Diphtheria notified during the year, but

after admission to hospital the diagnosis was not confirmed.

Supplies of Anti Toxin can be obtained by Medical Practitioners for the treatment of suspected cases and contacts on application to the Huddersfield Royal Infirmary and Mill Hill Isolation Hospital, Huddersfield.

During the year 7 children of school age and 85 children under 5 years of age received a complete course of injections. Owing to the incomplete records available, it is impossible to give an accurrate estimate of the total number of children in the District who have received a complete course of injections.

Scarlet Fever

During the year 14 cases of Scarlet Fever were notified, 11 of which were confirmed, as compared with 21 in the previous year. Although the disease was mild in character in most of the cases all the patients were admitted to hospital, the 10 cases occuring before the 5th July being admitted to the Penistone Isolation Hospital, and the remainder to Mill Hill Isolation Hospital.

In March an outbreak of streptococcal sore throats occurred at the Nortonthorpe Remand Home, Scissett, 2 boys and 2 members of the staff being admitted to the Penistone Isolation Hospital as suspected cases of Scarlet Fever. In only one case, however, was the

diagnosis confirmed.

The distribution of the cases in the various wards is shown in the table given below:—

| | | | Į. | | 5 5 | mag. | Sept | OCL. | TAOA | Dec. | T't'l |

Whooping Cough

The disease was much more prevalent in 1948 than in the previous year, 52 cases being notified as compared with 6 in 1947. The majority of the cases occurred in the first 4 months of the year, the ward chiefly affected being Skelmanthorpe with 36 cases. The distribution of the cases in the various wards is shown in the table given below:—

| Ward | Jan. | Feb. | Mar. | Apl | May | Jun. | July | Aug. | Sept | Oct. | Nov | Dec. | T't'l |

| Total | 2 | 1.4 | 12 | 13 | 2 | 4 | 3 | | | | 2 | | 52 |

Measles

A total of 185 cases of Measles were notified in 1948 as compared with 66 in the previous year. The incidence was highest during the middle two quarters of the year which is somewhat unusual. The distribution of the cases in the various wards is shown in the following table:—

| Ward | Jan. | Feb. | Mar. | Apl | May | Jun. | July | Aug. | Sept | Oct. | Nov | Dec. | T't'l |
|--------------------------|------|---------|------|-----|-----|------|------|----------------|------|------|-----|------|-------|

| Total | | 17 | 17 | | _ | 53 | 20 | 30 | 25 | 7 | 14 | 2 | 185 |

Acute Primary and Acute Influenzal Pnuemonia

One case of Acute Primary Pneumonia was notified during the year as compared with 4 in 1947. Deaths registered during 1948 as due to all forms of Pneumonia totalled 5 as compared with 7 in 1947.

Enteric Fever and Dysentery

No cases of these diseases were notified during the year and no deaths were notified as attributable to them.

Puerperal Pyrexia

One case of this condition was notified during 1948.

Erysipelas.

During the year 2 cases of Erysipelas were notified, one of which was admitted to the Mill Hill Isolation Hospital, Huddersfield.

Cancer

The number of deaths attributed to Cancer during the year numbered 24 (7 male, 17 female) as compared with 18 in the previous year, an increase of 6. The Cancer death rate for the year is 2.47 per 1,000 of the estimated population compared with a rate of 0.89 for the previous year. The corresponding rates for the Administrative County and the Urban Districts are 1.74 and 1.83 respectively.

Tuberculosis

A total of 3 new cases of Tuberculosis were added to the Notification Register during the year as compared with 4 in 1947.

A total of 2 deaths, both being males, from Pulmonary Tuberculosis were recorded during the year, and deaths from all other forms of Tuberculosis numbered 1, making a total of 3 deaths from all forms of Tuberculosis as compared with 5 in 1947.

The following tables give details of the number of cases on the Notification Register, together with particulars of new cases of Tuberculosis and deaths from Tuberculosis during the year.

Death Rate of Infants under I year per 1,000 live births 34.45

VITAL STATISTICS

Births

The number of live births registered in the Divisional area during 1948 was 1,161 (606 males, 555 females) representing a rate of 15.70 per thousand of the estimated population.

Illegitimate births numbered 46 or 3.96% of the total live births.

Deaths

The deaths assigned to the Divisional area after correction for transfers were 969 (493 males. 476 females), the Death Rate from all causes being 13.11 per 1,000 of the estimated population.

The following were the principal causes of death in order of

| frequency | : | |
|-----------|----------------------------------------------------------|------|
| (i) | Diseases of the Heart and Circulatory System | 3,52 |
| (ii) | Cancer | 173 |
| (iii) | Intra-cranial Vascular Lesions | 117 |
| (iv) | Respiratory Disease's (excluding Fulmonary | |
| ` / | Tuberculosis) | 92 |
| 7 | These 4 causes accounted for 75.75% of the total deaths. | |

Infant Mortality

In 1948 the deaths of infants under one year of age numbered 40, including 4 illegitimate infants, giving an Infant Mortality Rate of 34.45 per 1,000 Live Births. The Death Rate amongst legitimate infants per 1,000 legitimate live births is 32.29 whilst the rate amongst illegitimate infants is 86.95.

The following table gives the causes of death of all infants at

CARE OF MOTHERS AND YOUNG CHILDREN

Health Visiting

At the commencement of the year only 8 Health Visitors were engaged in the Division. Several new appointments and transfers were made during the year and the position at the end of the year is shown below:—

| Urban D | | | | | Visi | |
|-----------|-------|------|------|------|------|---|
| Colne V | alley | | | | | 3 |
| Denby D | ale | | | | | I |
| Holmfirt | | | | | / | |
| Kirkburto | n | | | | | _ |

Home visiting is the chief duty of Health Visitors and in 1948 they made a total of 14,910 visits as follows:—

| District | | | First Visits | Other Visits | Total Visits |
|--------------|------|------|--------------|--------------|--------------|
| Colne Valley | | | 646 | 3,736 | 4,382 |
| Denby Dale | | **** | 256 | 2,383 | 2,639 |

| | | | | | |
| | | | 1,972 | 12,938 | 14,910 |

Ante-Natal Clinics

There are 9 Ante-Natal Clinics in the Division, these being held monthly at Denby Dale, Holmfirth, Lepton, Linthwaite, Meltham and Skelmanthorpe, and fortnightly at Marsden, Golcar and Slaithwaite.

Since the introduction of the National Health Service Act there has been a considerable falling off in attendances at some clinics due to the fact that more expectant mothers are relying on their general practioners for ante-natal supervision. During the year 325 patients made attendances at the various clinics, details of which are shown in the following table:—

| Clinic | No. of sessions | No. of patients | No. of attendances | Average at- tendance per session |
|---------------|-----------------|-----------------|--------------------|----------------------------------------|
| Denby Dale | . 12 | 23 | * 74 | 6.2 |
| Holmfirth | . 12 | 28 | 83 | 7.0 |
| Lepton | . 12 | 47 | 167 | 14.0 |
| Linthwaite | . 12 | 19 | 70 | 5.8 |
| Meltham | . 12 | 50 | 171 | 14.25 |
| Skelmanthorpe | . 12 | 42 | 130 | 10.83 |
| Marsden | . 24 | 44 | 221 | 9.2 |
| Golcar | . 22 | 37 | 206 | 9.3 |
| Slaithwaite | 25 | 35 | 159 | 6.3 |
| | 143 | 325 | 1,281 | 8.9 |

In addition to the regular Ante-Natal Clinics occasional patients are seen at the Child Welfare Clinics.

CHILD WELFARE CLINICS

Weekly clinic sessions are held at Golcar, Holmfirth, Honley, Kirkburton, Lepton, Linthwaite, Marsden, Meltham, New Mill and Slaithwaite, whilst clinics are conducted fortnightly at Denby Dale and Skelmanthorpe.

During the year 2,456 children were seen and a total of 18,882 attendances were made, details of which are shown in the following table:—

| | No. of | Chil | dren se | en | Att | tendand | ces | Average attendance per session | | |
|---------------|---------------|---------|---------|-------|--------|---------|--------|--------------------------------------|------|--|
| Clinic | sess- ions | Under 1 | 1-5 | Total | Under | 1-5 | Total | Under | 1-5 | |
| Golcar | 51 | 63 | 124 | 187 | 996 | 724 | 1,720 | 19.5 | 14.2 | |
| Holmfirth | 52 | 72 | 133 | 205 | 914 | 514 | 1,428 | 17.6 | 10.0 | |
| Honley | 50 | 53 | 162 | 215 | 940 | 813 | 1,753 | 18.8 | 16.3 | |
| Kirkburton | 48 | 48 | 47 | 95 | 610 | 225 | 835 | 12.7 | 4.7 | |
| Lepton | 48 | 157 | 302 | 459 | 2,154 | 312 | 2,466 | 44.8 | 6.5 | |
| Linthwaite | 52 | 29 | 118 | 147 | 610 | 408 | 1,018 | 11.7 | 7.8 | |
| Marsden | 52 | 77 | 257 | 334 | 1,543 | 1,326 | 2,869 | 29.7 | 25.5 | |
| Meltham | 47 | 64 | 152 | 216 | 1,236 | 930 | 2,166 | 26.3 | 19.8 | |
| New Mill | 52 | 39 | 90 | 129 | 742 | 522 | 1,264 | 14.3 | 10.0 | |
| Slaithwaite | 52 | 53 | 136 | 189 | 974 | 823 | 1,797 | 18.7 | 16.0 | |
| Denby Dale | 26 | 58 | 81 | 139 | 429 | 325 | 754 | 16.5 | 12.5 | |
| Skelmanthorpe | e 25 | 41 | 100 | 141 | 461 | 351 | 812 | 18.4 | 14.0 | |
| | 555 | 754 | 1,702 | 2,456 | 11,609 | 7,273 | 18,882 | 20.91 | 13.1 | |

Apart from the one at Golcar, all Ante-Natal and Child Welfare Clinics are held in hired premises. Many of them are not very suitable for the purpose. Lofty Victorian Halls are difficult to heat and the fact that all equipment has to be brought out and arranged before each clinic and packed away again at the close adds considerably to the inconvenience of the nurse in charge. In spite of these drawbacks the Health Visitors and the Ladies' Voluntary Committees make the clinics as attractive as possible, but the only real solution is the erection of specially designed buildings.

Domiciliary Midwifery

At the beginning of the year 2 whole-time Midwives were employed by the County Council, one at Golcar and the other at Slaithwaite. The latter resigned her appointment and left the service of the County Council in February. A new Midwife took up duty in Slaithwaito in September. In addition to the whole-time County Midwives, 2 whole-time Midwives were employed on district work by the Holme Valley Memorial Hospital Committee and 16 Nurse/Midwives were employed by 14 District Nursing Associations,

On the 5th July, 1948, under the National Health Service Act, the nursing staff of all the District Nursing Associations became members of the County Council staff.

One independent Midwife signified her intention to practise in the area and attended a total of 2 cases.

Of the 1,125 births notified and attributed to the division 511 occurred at home. The following table shows the number of cases attended:—

| Cases attended by | | As Midwives | As Maternity Nurses |
|--------------------------------|------|-------------|---------------------|
| (a) Whole-time County Midwives | (2) | 62 | 8 |
| (b) Whole-time Dist. Midwives | (2) | 99 | 3 |
| (c) Nurse/Midwives | (15) | 303 | 34 |
| (d) Independent Midwives | (1) | _ | 2 |
| | | 101 | 15 |
| | | 464 | 47 |

In addition, 3 births attributed to the Division occurred in private premises outside the Division.

It is the intention to eventually separate the Midwifery and Home Nursing Services, and although it will be some time before this can be accomplished all new appointments are made with this intention in view.

The position at the end of the year regarding Midwifery Services was as follows:—

| Urban District | | | | Whole-time Midwives | Nurse/Midwives | Y |
|----------------|--|------|---------|------------------------|----------------|---|
| Colne Valley | | | | 2 | 1 | - |
| Denby Dale | | | • • • • | _ | 5 | |
| Holmfirth | | •••• | | 2 | 2 | |
| Kirkburton | | **** | | | 5 | |
| Meltham | | | • • • • | - | 2 | |

Gas and Air Analgesia.

It is the intention to provide every practising Midwife with a Gas and Air Apparatus for use in relieving pain in childbirth. At the end of 1948, of the 19 Midwives in domiciliary practice 10 held the certificate in Gas and Air Analgesia administration and were equipped with the necessary apparatus.

Maternity Accommodation

19

166

Maternity accommodation for the County area around Huddersfield has for a long time past been provided at the Princess Royal Maternity Home by arrangement with the Huddersfield Corporation. Towards the end of 1947 the Corporation intimated that owing to shortage of nursing staff they would be unable in the future to accept bookings for County patients. This created a very serious situation as the nearest County Hospitals at which maternity accommodation was available were the Staincliffe Hospital, Dewsbury, and the White Rose Hospital, Wakefield, and in these hospitals accommodation was strictly limited.

A system of priority booking was instituted and only patients recommended on medical grounds or with unsuitable home conditions were accepted. Plans were formulated for the establishment of a small maternity ward at Deanhouse County Hospital but fortunately before this materialised the nursing situation at the Princess Royal Maternity Home improved, and County patients were again admitted there.

With the coming into force of the National Health Service Act the differentiation between Borough and County patients ceased to exist.

Particulars of places of confinement for the births attributed to the Division are shown in the following table:—

| Place of Confinement Total | Colne Valley | Denby Dale | Holm- firth | Kirk- burton 247 | Mel- tham | Total |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|------------------------------------|--------------------------------------|--------------------------------------|---------------------------------------------|-----------------------------------------------|
| Domiciliary Princess Royal Maternity Home Holme Valley Memorial Hospital St. Luke's Hospital Staincliffe General Hospital Huddersfield Royal Infirmary Halifax Royal Infirmary Private Nursing Homes | 142 165 — 1 5 22 — 19 | 103 38 — 2 6 1 7 | 98 10 161 3 1 6 -7 | 115 95 4 11 13 - 9 | 56 21 1 — — — 1 — 2 | 514 329 162 8 19 48 1 44 |

Home Nursing Service

Prior to the coming into operation of the National Health Service Act, Home Nursing was provided throughout the Division by 15 District Nursing Associations who employed 4 Nurses and 16 Nurse-Midwives. The establishment of Midwives, Home Nurses and Health Visitors, approved by the Minister of Health under the National Health Service Act, is as follows:—

| Urban Distric | t | | Midwives | Home Nurses | Health Visitors |
|---------------|------|-----|----------|-------------|-----------------|
| Colne Valley | | ••• | 3 | 3 | $4\frac{1}{2}$ |
| Denby Dale | | | 2 | 2 | 2 |
| Holmfirth | •••• | | 2 | 2 | 4 |
| Kirkburton | | | 2 | 3 | 31/2 |
| Meltham | | | 1 | 1 | 1 |
| | | | 10 | 11 | 15 |

As in the case of Midwives, where resignations have occurred the opportunity has been taken to further the policy of separating Midwifery, Home Nursing and Health Visiting. The position at the end of the year was as follows:—

| Urban District | | | Home Nurses | Nurse/Midwives |
|----------------|-----|------|-------------|----------------|
| Colne Valley | | | 2 | 1 |
| Denby Dale | | | | 5 |
| Holmfirth | *** | | 2 | 2 |
| Kirkburton | | | | 5 |
| Meltham | | | _ | 2 |

As the Home Nursing Service was not taken over by the County Council until the 5th July, 1948, details are only available for the second half of the year. When the service was taken over by the County Council 142 patients were receiving attention, 898 new cases were accepted during the 6 months and a total of 16,200 visits were made.

Particulars of the work done in the various districts by Home Nurses and Nurse/Midwives are shown in the table given below. From the figures shown in this table it will be seen that the amount of work done by the Home Nurses varies considerably. Some re-arrangement of districts is necessary so as to more equalise the work but this is not easy to carry out at the present time, the principal difficulties being the lack of suitable housing accommodation in the right places and the shortage of motor cars.

| Total for Division | 142 | 898 | 16,200 | 439 | 8,285 |

Types and Duration of Cases Treated

An attempt has been made to analyse the types and duration of cases treated during the year. These vary considerably in the different districts. In some, the nurse's time is largely devoted to attendance on the chronic sick, whilst in other districts many acute medical and post-operative surgical cases receive attention. Increased use is also being made of Home Nurses by General Practitioners for the administration of drugs by injection, and particularly of penicillin.

At Emley it has been customary for some time past for the nurse to hold morning and evening dressing sessions at her home. This has continued and during the 6 months 63 patients suffering mainly from minor injuries have made 307 attendances.

Of the 740 cases the nurses ceased to attend during the 6 months were discharged as recovered, 78 were transferred to hospital and 119 died.

The tables given below show the duration of treatment and the number of visits to patients in each group.

| Patients under Treatment | | | | Patients. | | | |
|---------------------------------------------------------------|---|--|--|------------------------------|---------------------------|----------------------------|--|
| | | | | Recovered | Transferred | Died | |
| Less than 1 week 1- 2 weeks 2- 4 weeks 4-13 weeks 3- 6 months | | | | 219 143 111 66 4 | 34 12 10 19 3 | 51 20 13 22 13 | |
| TOTA | L | | | 543 | 78 | 119 | |

| Number of Visits Paid | | | | To Patients Who | | | |
|--------------------------------------------|-------|--|--|-------------------------------------------|-------------|----------|--|
| | | | | Recovered | Transferred | Died | |
| 3 or less | | | | 148 | 20 | 24 | |
| $\begin{array}{c} 4-7 \\ 8-15 \end{array}$ | | | | $\begin{array}{c} 176 \\ 131 \end{array}$ | 19 15 | 30 20 | |
| 16-30 31-50 | | | | 70 15 | . 15 | 22 | |
| 51-75 | | | | 1 | 2 | 5 4 | |
| 76–100 Over 100 | | | | 2 | 7 | 3 | |
| | TOTAL | | | 543 | 78 | 119 | |

Regarding the various types of cases attended, it will be seen from the table given below that Septic Conditions provided the largest number of new cases (106). Diseases of the Heart and Circulatory System (70) and Injuries (72) were the next most frequent cases, followed by Uterine Prolapse (67), Post-Operative Dressings (54), and Acute Abdominal Conditions (52). New cases of Cancer, all sites, numbered 36, and those of Bronchitis and Pneumonia were 20 and 19 respectively.

The number of visits paid to cases of the various diseases bears little relationship to the number of new cases.

Patients suffering from the following conditions received the largest number of visits:—

| Septic Conditions | 2,010 | Visits |
|-----------------------------------|-----------|--------|
| Diseases of Heart and Circulation | 1,991 | ,, |
| Cerebral Haemorrhage | 1,293 | ,, |
| Injuries | 1,199 | " |
| Post-Operative Dressings | 1,188 | ,,, |
| Cancer (all sites) | 1,153 | ,,, |
| Senility | 871 | ,,, |

The number of acute cases dealt with varies very much in the different nurses' districts, but on the average it would appear that more time is spent on the nursing of cases of chronic illness than on acute work.

| Type o | of Case | | | New Cases | Visits Paid |

Housing and Travelling Facilities for Home Nurses and Midwives

The pricipal difficulties experienced with regard to the administration of the Home Nursing and Domiciliary Midwifery Services have been in respect of housing and transport. No service can work satisfactorily without a contented staff and to get a contented nursing staff each nurse must have comfortable home conditions and be provided with a motor car.

Prior to the 5th July, 1948, negotiations were commenced for the taking over by the County Council by purchase or lease all houses owned or tenanted by the District Nursing Associations. Agreements have since been concluded for the purchase of 4 houses and the lease of 9 others. Unfortunately in 2 instances owners were unwilling to transfer the tenancies and in consequence one nurse left the service of the County Council. Help in solving housing difficulties has been given by Local Housing Authorities, tenancy agreements for 2 houses having been made with the Denby Dale Urban District Council and for 1 house with the Colne Valley Urban District Council. At the end of the year the County Council owned 3 houses occupied by Home Nurses or Midwives, leased 10 others, whilst 9 Nurses and Midwives were making their own arrangements regarding accommodation.

On taking over the Home Nursing Service the County Council agreed to buy from the local Nursing Associations all serviceable motor cars used by the Home Nurses and to pay travelling allowances to those nurses who were using their own cars. In all, 5 cars were purchased from Local Nursing Associations and 1 other was provided by the County Council. At the end of the year 1 Home Nurse and 5 Nurse/Midwives were using County Council cars: 2 Home Nurses, 4 Nurse/Midwives and 3 Midwives were receiving a travelling allowance for use of their own cars; and 1 Home Nurse, 6 Nurse/Midwives and 1 Midwife had to depend on public transport as a means of conveyance.

All possible steps are being taken to ensure that all Home Nurses and Midwives have the use of a motor car, but owing to the supply position it may be some time before this aim is attained.

Home Help Service

When Divisional administration commenced to operate this service was for practical purposes non-existent, only 4 part time Home Helps being on the roll, and all residing in the same area. Much difficulty was at first experienced in recruiting suitable women, probably because there is considerable part-time work available for women in the textile factories of the area and as out-workers at home. In June 1949 the wages and conditions of service of Home Helps were improved and since then an increasing number of ''helps'' has been available.

During 1948 Home Helps were provided for 5 cases.

Mental Deficiency Acts

The Divisional Medical Officer is responsible for the supervision of certified defectives in the area. This work is largely undertaken by the Mental Health Social Worker who regularly visits the patients on the register. She gives general advice on social matters associated with the care and management of defectives, and undertakes the home teaching of patients who are capable of engaging in handicrafts such as rug-making, simple needlework, etc.

At the end of the year the number of patients under supervision was as follows:—

| | Male | Female | Total |
|------------------------------|--------|--------|-------|
| Under Guardianship | 2 | 5 | 7 |
| Under Statutory Supervision | 32 | 27 | 59 |
| On Licence from Institutions | 2 | 3 | 5 |
| Under Voluntary Supervision | _ | 1 | 1 |
| Observation | 3 | 1 | 4 |

Ambulance Service

The Ambulance Service for the Division has been provided by the County Council since September, 1947, first on an agency basis and since the 5th July, 1948, as a part of the National Health Service.

The service made available under the Huddersfield and District Hospitals Contributory Scheme during recent years has become very largely a service for the conveyance of out-patients to hospital for treatment. This has continued under the National Health Service as will be seen from the following figures, which relate to the Huddersfield Depot and have been kindly supplied by Mr. V. Whittaker, the County Ambulance Officer. Of 6,067 patients carried during the 6 months ending the 31st December, 1948, 5,641 were hospital out-patients, 5,365 being sitting cases. The large amount of this type of work necessitates a number of patients travelling together. Detours also have to be made in order to collect and deliver home a full load of patients. Complaints regarding delays have been received from time to time but it will be appreciated that this is inevitable unless a private service for each out-patient is provided. Such expense would be prohibitive and quite unwarranted.

In all, during the period, the ambulances from the Huddersfield County Depot made 2,822 journeys involving 52,011 miles and carried 6,067 patients, 702 of these being stretcher cases.

| | | | | | | T | otal. | 6067 |
| | ••• | | | | | | | of the cases carried are given below |

In addition to the ambulances stationed at the Huddersfield Depot, an ambulance, the property of the Holmfirth Urban District Council, is operated as part of the County Service. This ambulance is available for accident work in the Holmfirth area, the staff coming on duty when called. During the 6 months ended 31st December, 1948, the Holmfirth ambulance carried 28 cases and travelled 169 miles.

Vaccination and Immunisation

Arrangements for protective treatment against Diphtheria have been continued as in previous years, 1,043 children being immunised during the year. In addition 476 children received refresher injections.

Details are given in the following table:—

| Urban District | Number of Ch | "Booster" Doses | | |
|----------------|---------------|-----------------|-------|-----|
| | Under 5 years | | | |
| Colne Valley | 330 | 12 | 342 | 136 |
| Denby Dale | 85 | 7 | 92 | _ |
| Holmfirth | 282 | 83 | 365 | 297 |
| Kirkburton | 127 | 11 | 138 | 8 |
| Meltham | 90 | 16 | 106 | 35 |
| TOTALS | 914 | 129 | 1,043 | 476 |

Records of the immunisation state of children in the Divisional area are incomplete and the number of children immunised at the 31st December, 1948, is no doubt considerably higher than shown below:—

| Age at 31-12-48 i.e., Born in Year | Under 1 1948 | 1 1947 | 2 1946 | 3 1945 | 4 1944 | 5 to 9 1939-43 | 10 to 14 1934–38 | Total Under 15 |
|-----------------------------------------------------------------------------------------------|--------------------|-----------|-----------|------------|-----------|-------------------|---------------------|----------------------|
| Number immunised | 12 | 679 | 670 | 496 | 319 | 1,249 | 2,125 | 5,544 |
| Estimated mid- year child popula- tion 1948, as sup- plied by Regis- trar-General | | | 5,693 | Childre 8, | 13,885 | | | |
| Percentage of child population immunised | 38.22 | | | | | 4 | 1.19 | 39.93 |

During the year there were no confirmed cases of Diphtheria in children under 15 years of age.

Until the 5th July, 1948, vaccinations were performed by Public Vaccinators and since then by any medical practitoner. Under the scheme approved by the Minister of Health vaccination is performed either by a Medical Officer of the Local Health Authority or by a general medical practitioner. Medical practitioners submit record cards to the Divisional Medical Officer in respect of vaccinations performed. No figures are available for the period prior to the 5th July, 1948.

Particulars of record cards received for the period 5th July, 1948, to 31st December, 1948, are given in the following table:—

| | | No. of persons vaccinated (or re-vaccinated) from 5-7-48/31-12-48 | | | | | | | | |
|--------------|-------|-------------------------------------------------------------------|-------|--------------|-------|--------------|-------|--------------|-------|--------------|

School Health Service.

The day to day administration of the School Health Service was taken over on a Divisional basis on the 1st June, 1948. Owing to war conditions and shortage of staff in general, routine medical inspections in the Division have been much neglected during recent years. Thus, on taking over the service it was found that in approximately only a quarter of the schools had an inspection been carried out in the previous 12 months, and that in at least another quarter an inspection had not taken place for over 3 years.

13a

The difficulties of the Division increased by the transfer to another Division at the beginning of June of Dr. A. Marshall, who had undertaken School Health and Maternity and Child Welfare work in the area for several years. Advertisements were issued in the medical press during May for the appointment of a Deputy Divisional Medical Officer but no suitable applications were received. One of the applicants, however, Dr. S. M. B. Perry, accepted an appointment as an Assistant County Medical Officer and commenced duty on the 1st July, 1948. A second Assistant County Medical Officer Dr. J. P. J. Burns, was later appointed and commenced duty on the 18th July, 1948. Unfortunately both these officers found the housing and accommodation problem in Huddersfield so difficult that they resigned their appointments and left the County Council's service only 3 months after taking up their duties in the Division.

As the summer vacation commenced shortly after the Assistant County Medical Officers took up their appointment it was not possible to commence routine inspections until the end of August, but between then and the middle of October when the 2 Assistant County Medical Officers ceased to be employed routine medical inspections were carried out at about half the schools in the Division.

In November Dr. W. G. Smeaton was appointed Deputy Divisional Medical Officer, but he was unable to commence his duties until March, 1949. A small number of routine medical inspections was conducted by Dr. J. R. Cockroft of Halifax who was engaged on a sessional basis. *

All the figures given relate to the whole year's work and include that done by Dr. Marshall before the administration was taken over on a Divisional basis.

Routine Medical Inspections

During 1948 routine medical inspections were carried out at the following 53 schools:—

Colne Valley Urban District

Slaithwaite C. of E. Knowl Bank County Scapegoat Hill County Clough Head County Golcar C. of E. Marsden C. of E. Linthwaite C. of E. Scammonden C. of E. Wilberlee County
Marsden County Infants'

Lepton County Infants
Kirkheaton C. of E. Infants
Farnley Tyas C. of E.

Meltham Urban District

Meltham Mills C. of E. Meltham C. of E. Wilshaw C. of E.

At these Schools a total of 3,620 children were given a routine examination, 50 were examined as "Specials" and 161 as "FollowUps". The low number of children seen as Specials is mainly due to the fact that owing to the length of time which had elapsed since the last routine inspection at some Schools, a very large number of the pupils who would normally have been seen as Specials were due for routine examination. The age distribution of the children examined is shown in the following table:—

| Special Examinations 50 Re-Examinations 161 |
|------------------------------------------------|
| 4 |
| 211 |
| 0 : |
| |

Total number of examinations: 3,831.

Defects Found.

Of the 3,831 children examined, 827 were found to require treatment for some defect, whilst it was felt desirable that a further 856 should be kept under observation. A full list of the defects found is shown in the following tables:

| Age Group | Defective Vision (excluding Squint). | All other conditions | Total Individual Pupils |
|---------------------------|-----------------------------------------------|----------------------|-------------------------------|
| Entrants | 94 | 407 | 494 |
| Second Age Group | 104 | 160 | 257 |
| Third Age Group | 13 | 25 | 37 |
| Special & Re-examinations | 16 | 23 | 39 |
| TOTAL | 227 | 615 | 827 |

| | | Number o | of Defects. | | |
|-------------------------------------------------|------------------------|-------------------------------|------------------------|-------------------------------|--|

| Psychological (a) Development (b) Stability | 27 | 2 1 | 4 | _ | |
| Other | 36 | 72 | 1 | _ | |
| TOTAL | 862 | 856 | 39 | 1 | |

General Condition.

All children given a routine examination were classified as to general condition. In 26.5% of children this was considered to be good; in 58.1% to be fair; and in 15.4% to be poor. The high percentage of children in the last category is probably due to the unusually high standard of assessment used by the Assistant Medical Officers who conducted the examinations.

Details are given in the following table:

| | Total | G | ood | F | air | Poor | |
|------------------|---------------------|-----|---------------|------|---------------|------|---------------|
| Age Group | Number Inspected | No. | % of Total | No. | % of Total | No. | % of Total |

| Third Age Group | 114 | 46 | 40.4 | 52 | 45.6 | 16 | 14.0 |
| TOTAL | 3620 | 961 | 26.5 | 2103 | 58.1 | 556 | 15.4 |

Arrangements for Treatment.

Special Clinics have been arranged for children suffering from Ear, Nose and Throat defects, and defective vision, the former being held at the Huddersfield Royal Infirmary and the latter at hired premises in various parts of the Division. The parents of children suffering from major defects were advised to seek the advice of their family practitioners, whilst many children with minor defects were treated by the School Nurses at the Schools and School Clinics.

Owing to the difficulty in distinguishing between cases treated under the Authority's Schemes and those treated otherwise, the following tables include all cases known to the Authority to have received treatment, whether at the Clinics or elsewhere.

Group 1—Minor Ailments. (a)

| Ailments. | Number treated or under treatment during Year. |
|--------------------------------------------------------------------------------------------------------------|------------------------------------------------------|
| Skin: (a) Ringworm—body (b) Scabies (c) Impetigo (d) Other | 3 6 20 43 |
| Eye Disease (external and other, but excluding errors of refraction, squint, and cases admitted to Hospital) | 33 |
| Ear Defects | 41 |
| Miscellaneous (e.g. minor injuries, bruises, sores, etc.) | 451 |
| TOTAL | 597 |

(b) Total number of attendances at Authority's Minor Ailments Clinics: 902.

Group II—Defective Vision and Squint.

Group III—Treatment of Defects of Nose and Throat.

| • | Received Operative Treatment for: | | Number eated. |
|-----|-----------------------------------|-----------------------------------------|---------------|
| (a) | Adenoids and chronic Tonsillitis | | 172 |
| (b) | Other nose and throat conditions, | • • • • • • • • • • • • • • • • • • • • | 3 |
| | Received other form of treatment | | 9 |
| | Total , | , | 184 |

Inspections for Cleanliness.

All Schools are visited by the Health Visitors at least once a quarter for the purpose of inspecting all pupils regarding bodily cleanliness. During these visits a total of 26,687 individual examinations were made, and 911 children were found to be infested with vermin. In most instances the infestation was slight, and advice was given to parents, but in 6 cases exclusion from School was considered necessary.

Other Examinations.

In addition to the routine and Special examinations carried out at School, a large number of children were examined for various special reasons including suitability to attend School camps, participation in entertainments and regarding the need for special educational treatment. In this last connection, a Register of Handicapped Pupils is maintained At' the present time this is known to be very incomplete.

At the end of the year 89 pupils were included, made up as follows:—

| Category | No. |
|--------------------------|-----|
| Deaf and Partially Deaf | 6 |
| Delicate | 12 |
| Educationally Sub-Normal | 33 |
| Epileptic | 2 |
| Physical | 25 |
| Speech | IO |
| Maladjusted | I |
| Total | 89 |

Pupils known to be in attendance at Special Schools at the end of the year are shown below:—

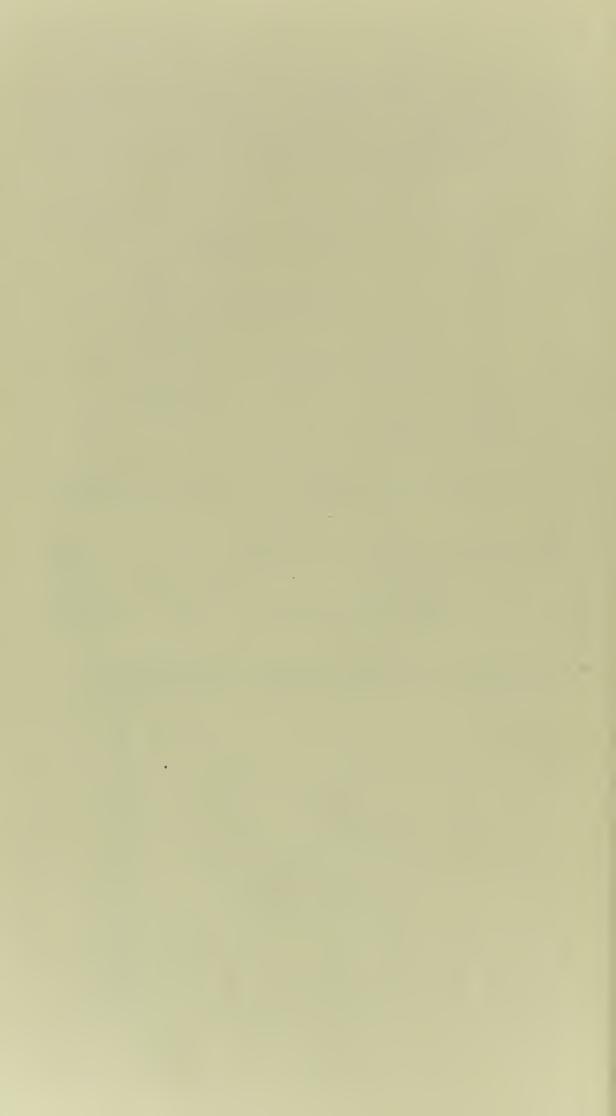

| | No. at Special | |
|-------------------------|-------------------|---------------------------------------|
| Category S | chool | Location of Special School |
| Deaf and Partially Deaf | 3 | 2 at Doncaster and 1 at Manchester |
| Delicate | I | North Devon |
| Physical | I | Thorpe Arch |

Provision of special educational treatment for educationally subnormal pupils is one of the most pressing needs of the Division.
